

# BOOREILAND QUALITY MARK.

LOVINGLY HANDCRAFTED WORK BY  
THE MIGHTY STAFF AT BOOREILAND.

Hi there! We are Booreiland. We love creating new things. The adventure of immersing ourselves into new worlds, exploring galaxies, not knowing where it ends keeps thrilling us. We are specialized in designing websites, print items and web connected products and services.

We see ourselves as an artisan workshop producing highly tailored work for our clients. We have listed the way we work in four cornerstones, which have been put together in one quality mark. Look out for this mark on the web, it is a sign of genuine Booreiland work.

#### **Dedicated crew.**

Whether it is our mighty staff itself, or our fantastic mix of freelancers, we always ensure the crew for a project is dedicated to the max and puts its love and soul into the final product.

#### **Thoughtful process.**

Every project starts with asking questions. Questions to our client about the goals, but also questions to ourselves on which way to follow in order to come to that astounding creation. This makes the process smart and far more efficient.

#### **Unconventional design.**

During our adventures we always seek for the uncommon. We believe this results in the most interesting and valuable creations, yet keeping them highly intuitive for the end user.

#### **Solid technologies.**

When seeking new horizons, you want to fully trust your equipment. That's why we only use proven and solid technologies when building our products. Besides that, we always make sure our web creations comply to the latest web standards.
